
Tiipstr – Application Overview

Tiipstr is a **social media application** that allows people to **share reviews** about other users, professionals, and businesses.

It's a single platform that connects **personal**, **professional**, and **business communities** — allowing users to interact, review, promote, and earn — all inside one app.

Main Concept

In most social media apps, people only share posts or photos — but Tiipstr is focused on **trust and reputation**.

Here, users can:

- Give honest **reviews** to others (personal, professional, or business).
 - Receive **feedback** from people they've helped or served.
 - Build **credibility** by collecting positive reviews.
 - **Promote** their services, businesses, or products.
 - **Earn rewards** through ad campaigns, sales, and activities.
-

User Profiles

Each user in Tiipstr can have **three types of profiles** within one account:

1 Personal Profile

- Created automatically after signing up.
- Works like a normal social media profile.
- Users can:
 - Follow or be followed.
 - Give and receive personal reviews.
 - Chat with friends.
 - View feeds, notifications, and posts.
 - Switch to professional or business profile anytime.

2 Professional Profile

- Created by users who want to represent their profession (doctor, lawyer, teacher, artist, etc.).
- Purpose: To allow people to **review professional services**.
- Example:
 - A doctor can be reviewed for good medical service.
 - A lawyer can be reviewed for effective legal help.
- The profile can include:
 - Profession details, work experience, qualifications.
 - Reviews received from clients or users.
 - Contact or booking options.

3 Business Profile

- Created by users who own or manage a business.
- Purpose: To let customers review **businesses and services**.
- Example:
 - A restaurant can receive reviews for its food.
 - A hotel can be reviewed for service quality.
- Business profiles can also:
 - Add products to the marketplace for sale.
 - Create ads and campaigns to promote their products.
 - Participate in the TiipTok ad and marketing system.

Login with SSO (Single Sign-On)

- Tiipstr uses a **common login system** through **Adrix**.
- When a user signs in or signs up, they are redirected to the **Adrix login page**.
- They enter their email and password (once approved in Adrix).
- After verification, the user is redirected back to **Tiipstr Dashboard**.
- All users across Tiipstr use **Adrix** as the central identity — this makes login secure and unified.

Tiipstr Dashboard

Once logged in, the user lands on the **Dashboard**, where they can:

- View their main activity (reviews, posts, followers, notifications).
- Switch between **Personal, Professional, and Business** profiles.
- Access all the key sections of the application from the main menu.

Main Sections (Tabs)

1. Me Tab

This is the **user's personal space** — it contains everything related to their account and reputation.

Here, the user can:

- View **reviews received** from others.
- View **reviews they've given**.
- See their **profile details** like name, bio, image, and profile type.
- Update their profile information.
- Check overall review ratings and feedback.

 It's like your **"personal summary"** inside Tiipstr.

2. Chat Tab

Tiipstr has its own **chat system**, similar to WhatsApp or Messenger.

Features include:

- **One-to-one chat** between users.
- **Group chat** (users can create and manage groups).
- Send text, images, and other files.
- Real-time message updates.
- **Add people** to groups and manage group settings.

It allows personal, professional, and business users to **communicate directly** inside the app.

3. Followers Tab

This section shows **people who follow you**.

From here, you can:

- View who your followers are.
- Visit their profiles.
- **Give reviews** directly to your followers.
- Send messages to your followers.

 It's all about managing your **audience and community**.

4. Following Tab

This tab shows **people you are following**.

You can:

- View their profiles.
 - Unfollow if you want.
 - Interact or review the people you follow.
-

5. Wallet Tab

Tiipstr includes a **digital wallet** that helps users manage money inside the platform.

Users can:

- Add bank accounts.
- Add money to their wallet.
- Transfer money to other users.
- Withdraw funds to their bank.
- View transaction history.

Wallet is also used for:

- Campaign rewards.

- Product sales.
- Service payments.

It connects the **social side and the business side** of Tiipstr.

6. Marketplace Tab

This is Tiipstr's **e-commerce section**.

Here, users can:

- **Buy products** listed by others.
- **Add products for sale** (only business users).
- View product reviews and details.
- Complete purchases using wallet or linked payments.

👉 It works like an online shopping system — but within the Tiipstr network.

7. X-Change Tab

This is one of Tiipstr's **most unique features** — a **marketing and ad campaign system**.

Here, business users can:

- Create and post **ad campaigns** for their products or services.
- These ads appear in **TiipTok** (Tiipstr's video section, like TikTok).
- When other users **view these ads**, they earn money in their wallet.
- If users **fill out ad-related forms**, they earn an additional amount.

So, **businesses gain promotion** and **users earn money** — it's a win-win system.

8. Services Tab

This tab is for **service-related listings**.

Users (especially professionals and businesses) can:

- Add their services (like AC repair, electrician, cleaning, etc.).
- Specify details, availability, and pricing.
- Customers can book or contact them directly.

- Users can review services they used.
-

9. MyBinz Tab

This section is for **renting items**.

Users can:

- List items they want to rent (car, bike, camera, etc.).
- Set rental prices, terms, and availability.
- Other users can request rentals.
- Payments are managed via wallet.

 It's like a **built-in rental marketplace** inside Tiipstr.

10. Invite User Tab

This tab allows existing users to **invite new people** to Tiipstr.

They can:

- Enter the **email** or **phone number** of someone.
 - Send an invitation link.
 - When the invited user joins, both can connect instantly.
-

11. Notification Tab

All updates appear here:

- New reviews.
- Messages.
- Followers.
- Campaign updates.
- Product sales and service bookings.

Users can click on a notification to jump directly to that activity.

12. Hotspot Tab

This is a **marketing and visibility feature** for businesses.

- Businesses can mark their physical location as a **Hotspot**.
 - When other users are nearby, they'll **see these hotspots**.
 - Example:
 - A café can mark itself as a hotspot.
 - Nearby Tiipstr users will see the café and current offers.
 - This helps businesses attract **local customers** easily.
-

13. Settings Tab

In Settings, users can customize their app experience.

Includes:

- **Notification Preferences**
- **Review Settings**
- **Category Management**
- **TiipTok Preferences**
- **Ads & Offers settings**

Basically, the user controls what kind of content and alerts they want.

14. Plan and Billing Tab

Tiipstr has a **membership plan system**.

Plans define what features a user can access.

Default plan after login → **Basic Plan**

Other plans include:

- **Monitor**
- **Engage**
- **Professional**
- **Control**
- **Business**

- **Business Plus**

Each higher plan provides **more tools, visibility, and marketing options**.

Some plans have **trial periods** (like Monitor and Engage).

Users can **upgrade monthly or yearly** depending on their needs.

15. Help Tab

Dedicated area for support.

Contains:

- FAQs
- Contact options
- Help forms or tickets

Users can reach out for any app-related problem.

16. Logout

Used to securely log out of Tiipstr and end the session.

How Everything Connects

When a new user signs in:

1. They log in through **Adrix (SSO)**.
2. They land on Tiipstr's dashboard as a **personal user**.
3. From the **My Profile** tab, they can create **Professional** or **Business** profiles.
4. Once their profiles are ready, they can explore all features:
 - **Give or receive reviews**
 - **Chat with others**
 - **Follow people**
 - **Buy or sell products**
 - **Create campaigns**
 - **Earn rewards**

- **Offer services**
- **Rent or book items**
- **Manage finances through the wallet**

Everything happens inside one ecosystem — **a social platform + professional network + e-commerce + marketing + services hub**, all combined.

Vision Behind Tiipstr

Tiipstr is built to connect **trust, reputation, and opportunity**.

It's not just about followers — it's about **real experiences, useful services, and authentic reviews**.

People can:

- Build their reputation through genuine feedback.
- Promote their work or business.
- Find trusted professionals.
- Earn money through engagement and ads.

In short — Tiipstr is a **complete lifestyle platform** that blends **social media, business, reviews, and marketing** into one connected community.
