

Subscription Plan Details

Free Plan

1.Initially, the user is on the free plan. If the user is on the free plan, a 'Subscribe' button will be visible on the dashboard and profile page. Clicking it will redirect them to the plan subscription page, where they can choose a subscription plan.

The screenshot shows the 'tiipstr' dashboard for a user named Reshmaa MS. The dashboard includes a sidebar with navigation options: Me, Followers, Following, Reviews, Inbox, Marketplace, My Bin, Help, and Logout. The main content area displays the user's profile with a circular avatar, a 3.9-star rating, 11 followers, and 12 following. Below the profile is a 'Subscribe' button. To the right, there is a list of reviews from other users, each showing the reviewer's name, rating, and a 'Subscribe' button.

Reviewer	Rating	Reviewed as	Date of Review
Femila M	4.7	Coworker	04-Oct-2024
Femila M	4.7	Coworker	04-Oct-2024
Resh MS	5.0	Coworker	03-Oct-2024
Femila M	4.7	Buyer	14-Aug-2024

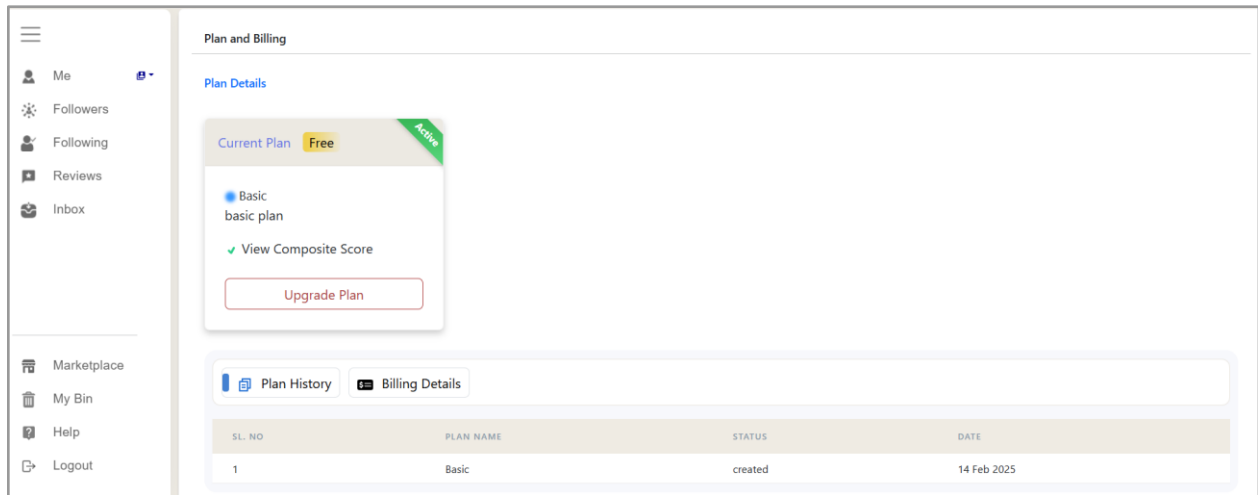

My profile

In the payment popup, the user can enter their card details and choose to enable auto-renewal. If enabled, the plan will renew automatically at the end of the billing cycle, and the payment will be deducted from the saved card. Additionally, users can select the occurrence for auto-renewal.

Clicking on pay now

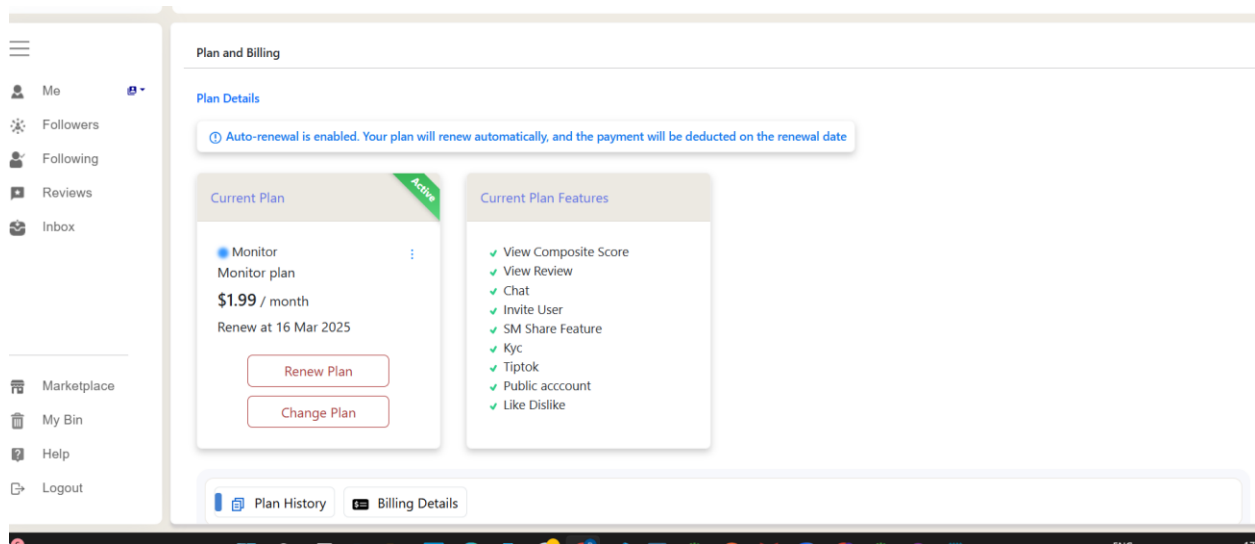

After payment the plan will get activated

Plans and billing section,

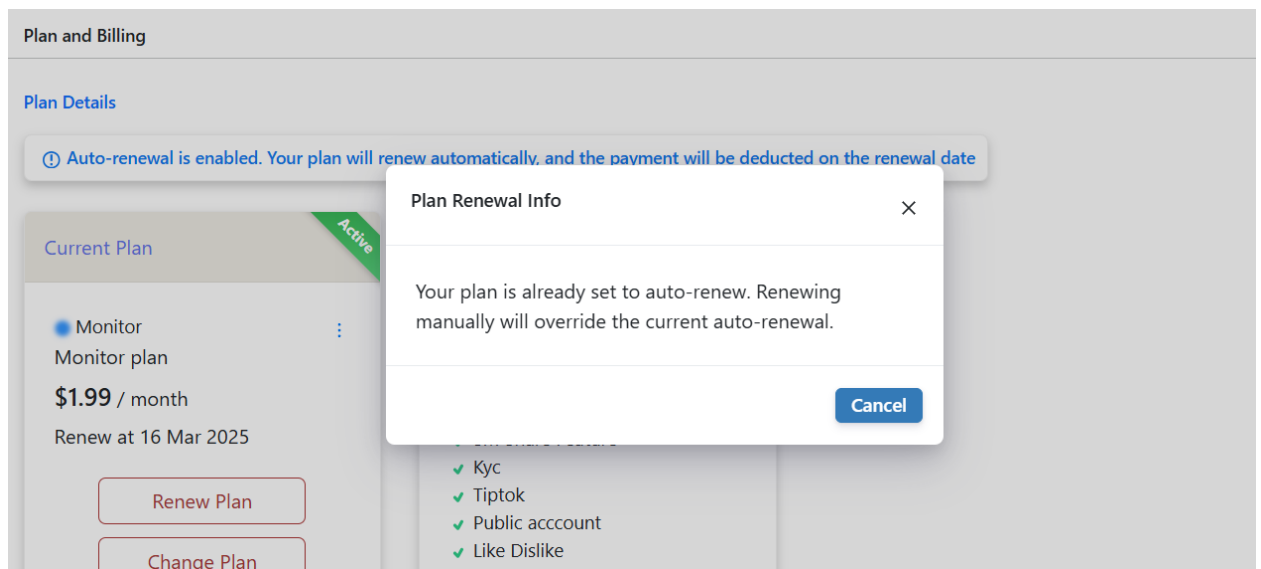

- User can view their active plan and has the option to renew or change it. which is shown below
- User can view their plan history and billing details

- If auto-renewal is enabled, an info message is displayed.

Renew plan

- If the user clicks on renew button while auto-renew is enabled it will show the message which is shown below

- If the user clicks the 'Renew' button while auto-renewal is disabled, they will be asked to enter their card details to complete the payment. Once the payment is successful, the plan will be renewed.
- If the user renews the plan before it expires, the renewal will start from today's date, and any remaining days from the current plan will be carried over to the renewed plan.

Change plan

- The 'Change Plan' option takes the user to the Subscription Plan page, where they can upgrade or downgrade their plan. If the user upgrades before it expires, any remaining days from the previous plan will be carried over to the new plan.

Plan Expires

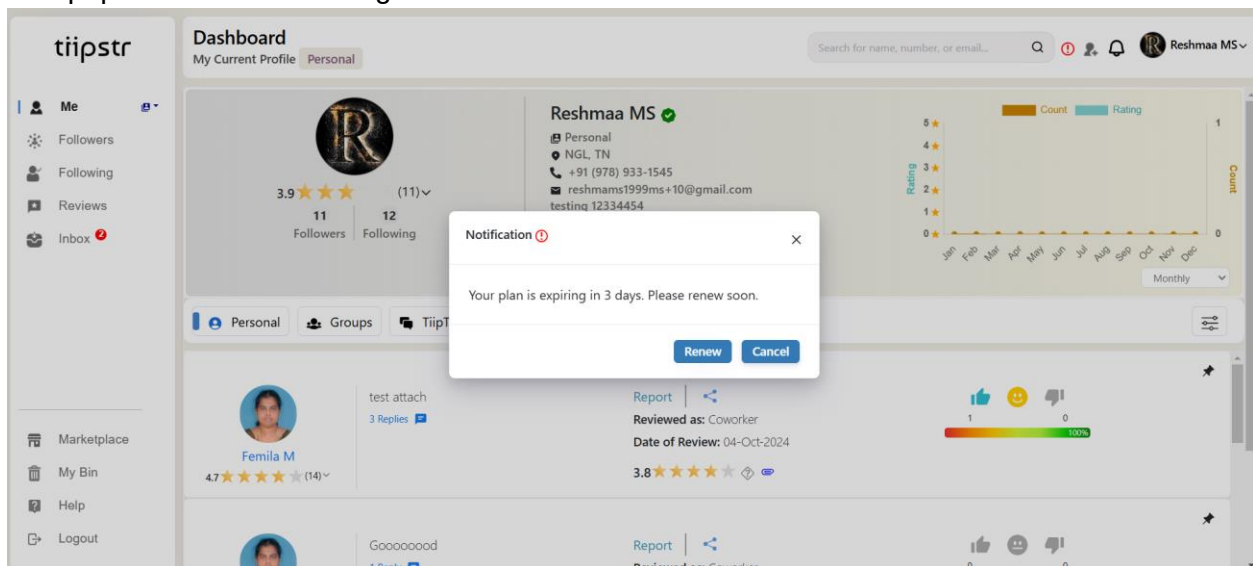

- If the plan expires, the user will get an additional 2 days to renew it. During this period, they can continue using the plan. An alert message (Your plan has expired. You have 2 additional days to renew it before access is restricted.) will be shown when they log in. **(ToDo)**
- If the user not renew until the 2 days then the plan will get cancelled and move to the basic free plan

Expiry Notification

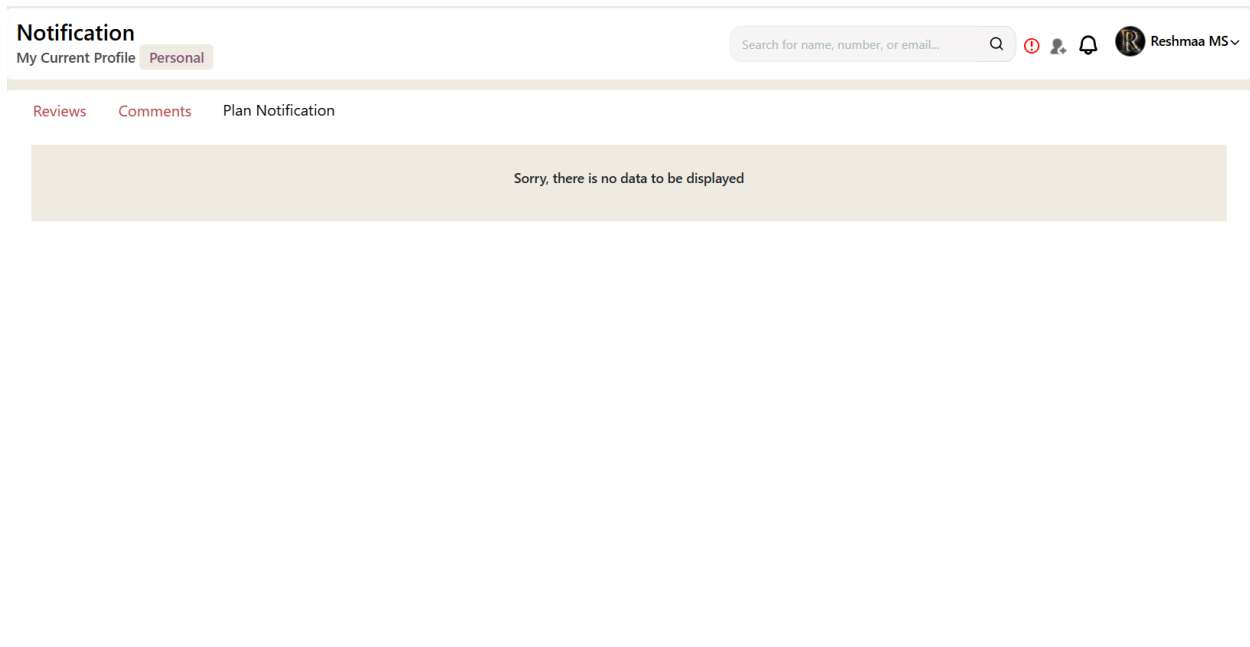

Plan Notification

- If the plan is about to expire, a notification will be sent **five days before the expiration date**.

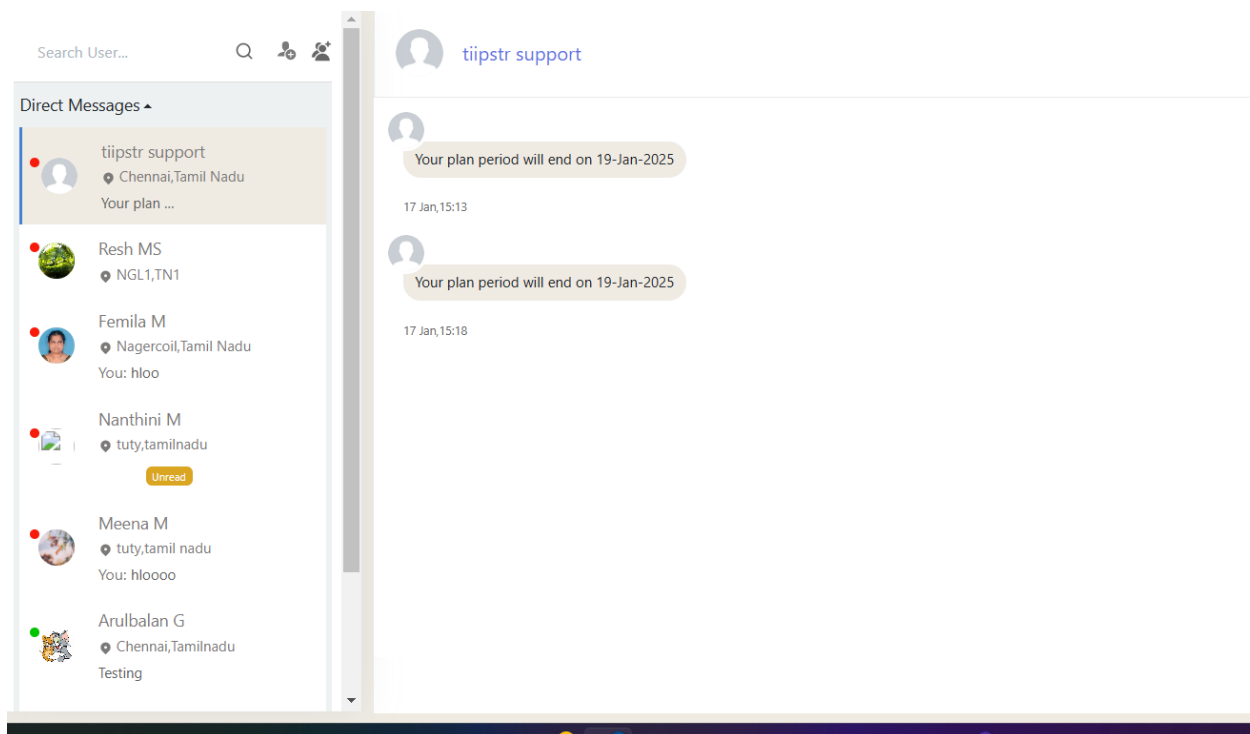

1. Popup Notification while log in

2. Marquee Notification.

4. In inbox, we can receive the plan notification

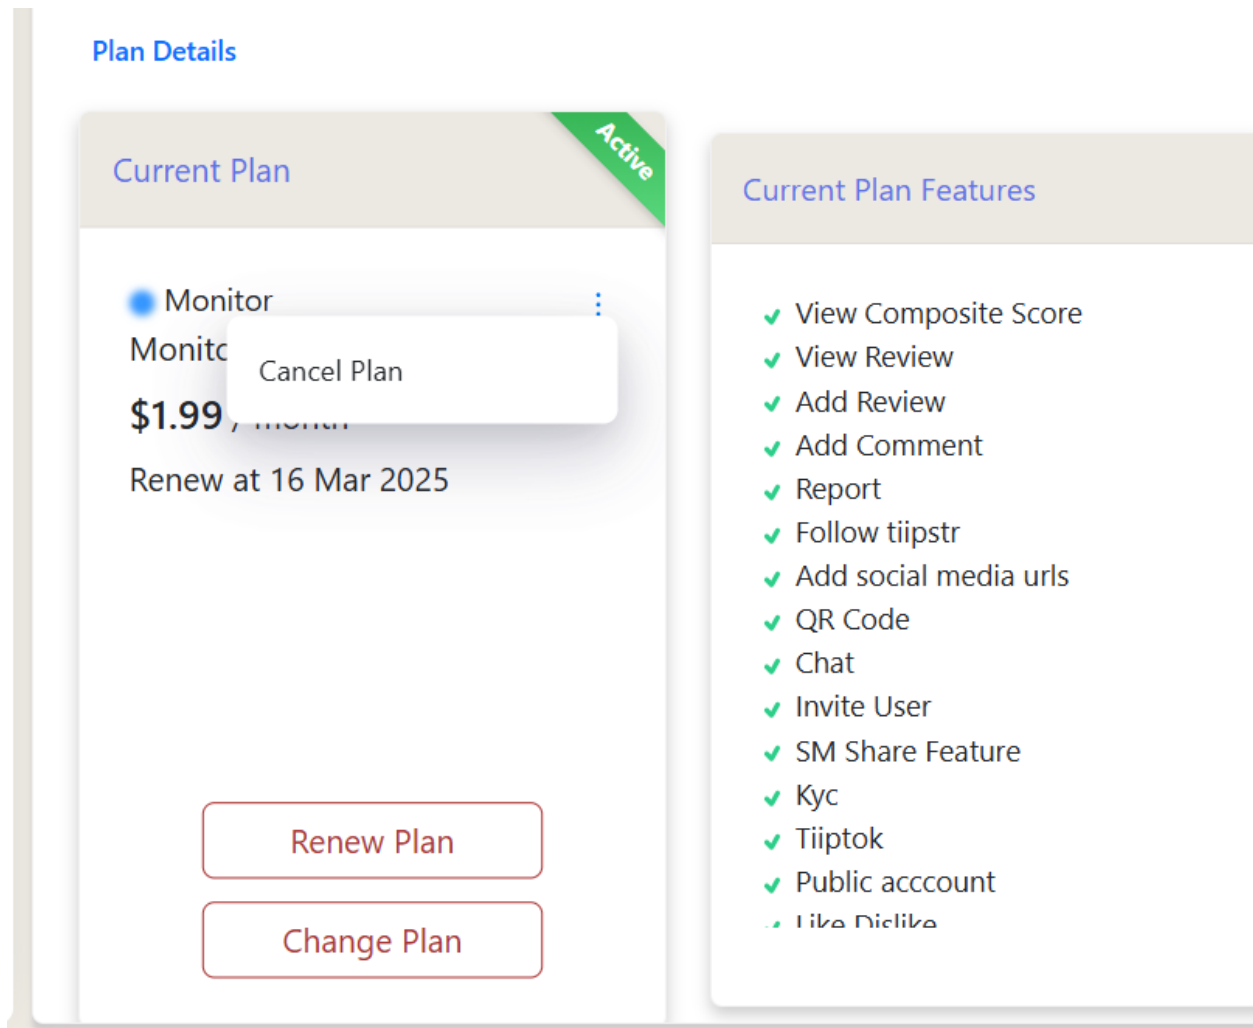

By default, notifications are sent via email. However, if phone or in-app notifications are enabled in the settings, users can receive notifications through those channels as well.

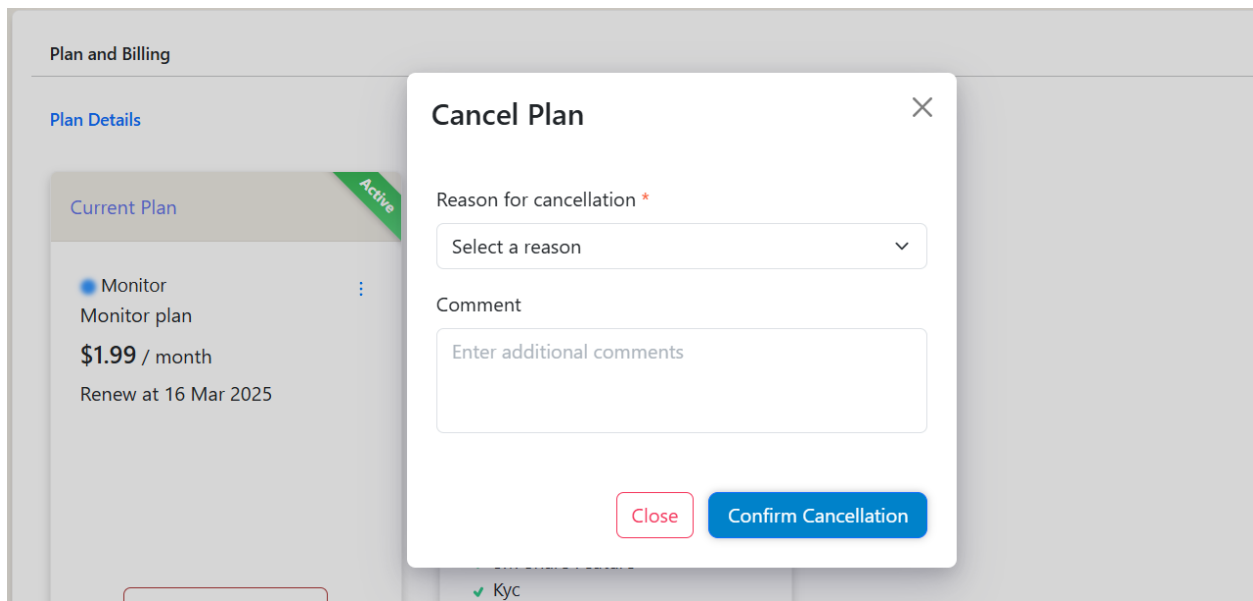

Downgrade Plan

- If we downgrade the plan through the 'Get Plan' option, the new plan will be activated after completing the payment. The user can continue using the previous plan until its end date if there are remaining days.

Cancel Plan

- On clicking the three dots, users can see the 'Cancel' option. If they click on 'Cancel,' they will be asked to provide a reason for cancellation and an optional comment.
- Upon confirming the cancellation, the user's plan will be canceled, they will lose access to that plan's features, and their account will be moved to the free basic plan.

Query

Do we need an auto-renewal enable/disable option in the plan and billing section?
